## NC visits CERN

**When** : 9th May 2009, 14:00

**Where** : Meeting point at the Reception at Building 33

### **What:**

- 1) ATLAS Experiment
- 2) Antimatter production
- 3) Microcosm Exhibition

### **Details**

This will be one of the very last occasions to visit one of the big experiments in the underground pit of the Large Hadron Collider at CERN - see <http://public.web.cern.ch/public/en/LHC/ATLAS-en.html>. Dr. Michael Doser will give us a guided tour through the ATLAS underground site.

### **Inscription**

The event is open to 14 people only on a first signed in, first served basis. Due to the restricted access it is open to NC members only. I will keep a waiting list, so in case that somebody has to pull back, the precious place can be filled.

### **Please inscribe at**

- sven.ravndal@hotmail.com

- until 1. May 2009

- indicate if you are coming by car, as we would need some cars to get to the Antimatter.

### **Coordinates**

*Coming from the Geneva railway station at Cornavin by bus*

Take the tram number 14 or 16 to Avanchet. From Avanchet take the number 56 bus marked to its terminus at the CERN entrance.

### **Travelling by Car**

Coming from the Swiss side

Follow "Aéroport", "Lyon" or "Meyrin". When in Meyrin head for "St. Genis" (which is just across the border in France). Before you get to St. Genis, CERN is on the left hand side of the "route de Meyrin", just before the border crossing. From 11 February 2008, traffic is diverted due to roadworks on the Route de Meyrin. Diversion signs are in place.

### **Coming from the French side (Ain)**

Follow "Gex" or "St. Genis". When in St. Genis head for the border.

CERN is on your right hand side immediately after the border crossing.
